Buch-Information

Hrsg.: Baratieri, Luiz Narciso
Titel: Inspiration
Untertitel: People, Teeth, and Restorations
Kurztext:

Natural tooth behaves much as a collection of mosaics that change color according to the type of light and media in which they are found, and it is this beauty of tooth composition and form that is the inspiration to those who seek to mimic tooth in dental restorations. This stunning atlas is the culmination of more than 25 years of dedicated study into the optical behavior of teeth and restorative materials. Although the author wows readers with dazzling photography throughout, this book moves beyond a mere clinical art book that only shows what is possible. The practical purpose of this book is also to outline the clinical sequences of how to use composite resins and dental ceramics to achieve the optical characteristics observed so exquisitely in natural teeth. By blending art and dental science, the author has created an ultimate textbook on dental anatomy and restorative dentistry that explores the underlying makeup of the layered structures of the teeth and reveals the techniques of how to meet the challenge of mimicking natural tooth.

Contents

Part I. Optical Behavior of Teeth and Restorations

Chapter 01. The Natural

Chapter 02. The Parts

- Enamel
- Dentin
- Dentinoenamel Junction
- Aging

Chapter 03. The Whole

- Counter-opalescence

Chapter 04. The Artificial

- Composite Resins
- Ceramics

Part II. Using Technology to Create Natural-Looking Restorations

Chapter 05. CAD/CAM Technology For the Manufacture of Dental Restorations

- CAD/CAM Technology and Its Applications in Dentistry
- History of the Development and Use of CAD/CAM Technology
- Steps of CAD/CAM Manufacturing and Workflow Possibilities
- Modern CAD/CAM Systems
- Restorative Materials for CAD/CAM Systems
- Final Considerations and Future Perspectives

Part III. Clinical Case Presentations

Chapter 06. Dental Bleaching Cases

Chapter 07. Restoration of Anterior Teeth: Direct Technique Cases

Chapter 08. Restoration of Anterior Teeth: Indirect Technique Cases

Chapter 09. Restoration of Posterior Teeth: Direct Technique

Chapter 10. Restoration of Posterior Teeth: Direct and Indirect Techniques

Chapter 11. Oral Rehabilitation Cases

Fachgebiet(e): Ästhetische Zahnheilkunde
