## Buch-Information

**Autoren:** Salvatore Scolavino / Gaetano Paolone

**Titel:** Posterior Direct Restorations

**Kurztext:**

This book achieves the ambitious aim of showing dentists how to create conservative and esthetic direct restorations of posterior teeth using composite resin. The book begins with a primer on occlusal anatomy, describing the specifics of each type of posterior tooth. This foundation supports the diagnosis and treatment of lesions, isolation, and cavity preparation for the buildup, as well as modeling, detailing, and finishing of restorations that closely mimic natural tooth anatomy for optimal esthetics and function. Numerous clinical tips and case examples are provided, and the procedural rationale is supported by scientific evidence, in addition to the authors' considerable clinical experience. Techniques for a wide range of clinical scenarios are presented to provide practitioners with the information they need to achieve optimal restorations.

**Contents**

Chapter 01. Shape and Visual Perception

Chapter 02. Anatomical Knowledge for Modeling

Chapter 03. Diagnosis and Treatment of Early Caries Lesions

Chapter 04. Isolation

Chapter 05. Cavity Preparation

Chapter 06. Restoring the Interproximal Wall

Chapter 07. Occlusal Modeling

Chapter 08. Detailing

Chapter 09. Finishing, Polishing, and Finalizing the Occlusion

Chapter 10. Clinical Cases

**Fachgebiet(e):** Zahnerhaltung, Zahnheilkunde allgemein, Restaurative Zahnheilkunde
