

Book information

Authors: Jan Stöhlmacher
Title: Damit Vertrauen im Sprechzimmer gelingt
Subtitle: A personal guide for patients and their relatives
Short text:

A trusting patient–doctor relationship is crucial for coping with health-related life crises in the best possible way. In this book, the author gives practical suggestions on how patients and their relatives can contribute to having trusting conversations with their doctor.

Due to his experience as an oncologist, and also because he is a close relative of cancer patients, the author is sensitized to the special importance of the discussion between the doctor, the patient, and the relatives. He also knows the constraints of everyday hospital life, and is aware of the needs, wishes, and questions of all those involved. The author allows those affected to speak for themselves and faces up to their questions, which are often uncomfortable for a doctor to answer.

This balanced combination of useful specialist knowledge and firsthand experience from his practice and personal life have allowed Prof. Stöhlmacher to write a valuable non-fiction book that is a very beneficial read.
