Book information

Editor: Filippi, Andreas / Saccardin, Fabio / Kühl, Sebastian

Title: Das große 1 x 1 der Oralchirurgie

Short text:

Following on from the publication of "Basic Oral Surgery" comes this perfect book on oral surgery for advanced colleagues. The book is aimed at professionals who perform oral surgery procedures more frequently in their practices and would like to update or further develop themselves. It also addresses (aspiring) specialists in oral surgery and oral and maxillofacial surgery.

Like the first book, this second volume is also designed as an atlas rather than a textbook: Especially the clinical chapters depict their theoretical content in short texts and are similarly divided into indications, contraindications, step-by-step clinical procedure, and postoperative course. The chapters are illustrated by numerous series of images as well as videos linked via QR codes. The content and scope of the book are based on the training catalogs and clinical spectrum of university oral surgery training clinics in Germany, Austria, and Switzerland.

Contents

Medical history.

Chapter 01. Complex patient profile in oral surgery

Special equipment in oral surgery.

Chapter 02. Optical magnification aids

Chapter 03. CO2 laser

Chapter 04. Piezosurgery

Chapter 05. Cone beam computed tomography

Bone-preserving interventions

Chapter 06. Alveolar stabilization

Chapter 07. Autologous dental hard materials

Chapter 08. Decoronation

Tooth preserving surgery.

Chapter 09. Exposure and classification

Chapter 10. Root tip resection

Chapter 11. Tooth transplantation

Chapter 12. Intentional replantation

Chapter 13. Transreplantation

Soft tissue surgery.

Chapter 14. Vestibuloplasty and apical displacement flap

Chapter 15. Autologous soft tissue grafts

Chapter 16. Recession coverage

Chapter 17. Salivary stone removal

Hard tissue surgery.

Chapter 18. Cystostomy and cystectomy

Chapter 19. Removal of exostoses

Chapter 20. Surgical revisions of the alveolar process

Temporary skeletal anchorages

Chapter 21. Orthodontic mini-implants

Chapter 22. Palatal implants

Evidence

Chapter 23. Evidence-based aspects
