## Book information

**Editor:** Pontius, Oliver Johannes  
**Title:** Comprehensive Endodontic Therapy

#### Short text:

This comprehensive guide, edited by Dr Oliver Pontius and co-authored by world-leading international authorities in their respective fields, has been designed for general dental practitioners, postgraduate dental students, and clinicians in other fields of dentistry. It is an up-to-date overview of endodontic knowledge and techniques, providing all the clinically relevant information to incorporate endodontics into general dental practice, emphasizing the relationship of endodontics with other dental disciplines. The book, enhanced by clear visuals and clinical protocols, is divided into six sections: the science of endodontics, diagnosis, advances in materials and technology, the practice of endodontics, prognosis, and interdisciplinary endodontics. Great importance has been afforded to diagnosis and treatment planning, allowing patient autonomy to make the final decision and always respecting what is in the patient's best interest. Anyone interested in predictable endodontics based on cutting-edge research and sound clinical data should consider reading this book.

#### Contents

##### Part A. The Science of Endodontics

Chapter 01. Keeping the Pulp Alive with Pulp Capping and Pulp Chamber Pulpotomy  
Chapter 02. Microbiology of Endodontic Infections  
Chapter 03. Understanding and Managing Apical Periodontitis  
Chapter 04. Cell-based and Cell-free Regenerative Endodontics

##### Part B. Diagnosis

Chapter 05. Endodontic Diagnosis  
Chapter 06. Radiology of Apical Periodontitis, Differential Diagnosis of Nonodontogenic Cystic Lesions  
Chapter 07. Differential Diagnosis of Orofacial Pain

##### Part C. Advances in Materials and Technology

Chapter 08. NiTi Instruments in Endodontics  
Chapter 09. Calcium Silicate-based Hydraulic Cements in Endodontics

##### Part D. The Practice of Endodontics

Chapter 10. The Aseptic Working Field  
Chapter 11. Endodontic Emergencies  
Chapter 12. Cleaning and Shaping Root Canal Systems  
Chapter 13. Irrigation and Disinfection of the Root Canal System  
Chapter 14. Lasers for Root Canal Cleaning and Disinfection  
Chapter 15. Philosophy of Filling Roots  
Chapter 16. Carrier-based Obturation  
Chapter 17. Endodontic Retreatment  
    (a) Decision making in Endodontic Retreatment  
    (b) Endodontic Retreatment Procedures  
    (c) Predictable and Minimally Invasive Instrument Removal  
Chapter 18. Microsurgical Endodontics  
Chapter 19. Intentional Replantation  
Chapter 20. Predictable Autotransplantation  
Chapter 21. Traumatic Dental Injuries of Permanent Teeth  
Chapter 22. Resorption of Permanent Teeth

##### Part E. Prognosis

Chapter 23. Factors Impacting the Outcomes of Nonsurgical Root Canal Treatments

Part F. Interdisciplinary Endodontics

Chapter 24. Maxillary Sinus Implications in Endodontics

Chapter 25. Endodontic–Periodontal Interaction

Chapter 26. The Endo–Restorative Interface

Chapter 27. Endodontics or Implants – Decisive Criteria and Guidelines for Single Tooth Restorations and Full-arch Reconstructions

Chapter 28. Endodontic Medicine
