## Book information

**Authors:** Qi Liu / Haidong Zhang / Jingwen Yang / Xia Yan / Chao Suo  
**Title:** Periodontal Surgery for Root Coverage  
**Subtitle:** A step-by-step guide

#### Short text:

This well-illustrated atlas focuses on advanced surgical techniques for restoring soft tissue defects around natural teeth caused by varying degrees of gingival recession. Following a discussion of the biologic basis and rationale for increasing soft tissue volume, the authors review the development and mechanisms of root coverage. They provide step-by-step instructions for the prevailing techniques of root coverage therapy for a successful pink esthetic treatment outcome. Clinical cases demonstrate the techniques, outlining evidence-based principles and clinical considerations in a clear and easy-to-follow manner. For those who want to learn to predictably treat gingival recession, this book is an excellent aid.

#### Contents

Chapter 1. Biologic principles of periodontal tissues  
 Chapter 2. Basic concepts of gingival recession and root coverage  
 Chapter 3. Instruments for root coverage surgery  
 Chapter 4. Presurgical preparation and postsurgical maintenance  
 Chapter 5. Free gingival graft and subepithelial connective tissue graft  
 Chapter 6. Coronally advanced flaps with subepithelial connective tissue graft: a classic protocol for root coverage  
 Chapter 7. Tunnel technique with subepithelial connective tissue graft for root coverage  
 Chapter 8. Two-stage technique

**Categories:** Oral/Maxillofacial Surgery, Oral Surgery, Periodontics, General Dentistry
