Buch-Information

Autoren: Oliver Reichert di Lorenzen
Titel: Veneer Visions / Vistas de Carillas
Kurztext:

Dental esthetics is about much more than simply optimizing the dentition. The state-of-the-art veneer procedures described in this atlas require neither reduction of tooth structure nor administration of anesthetic; the perfect smile can be delivered to patients in one painless appointment. This innovative technique of veneer fabrication challenges conventional methods of restoration and is tailored to meet the demands of cosmetic dentistry patients. Moreover, use of a wax-up/mock-up allows patients to experience the dramatic transformation for themselves by wearing the proposed smile makeover before committing to treatment. Abundant full-color before-and-after cases demonstrate the use of no-prep veneers alone and in combination with other fixed prostheses and present the esthetic possibilities of this revolutionary method. A dual English/Spanish language book.

La estética dental es mucho mas que una simple optimización de los dientes. La totalidad de las carillas que se muestran en este libro, no requieren de una preparación previa de los dientes. Se colocan por medio de un procedimiento exento de dolor, sin necesidad de reducción de la estructura dental y sin anestesis. Descubra cómo hacer carillas que dejarán a sus pacientes con la boca abierta. Libro bilingüe Inglés / Español

Contents

Chapter 01. Smile Transformations with 10 to 28 Veneers
Chapter 02. Smile Transformations with up to 6 Veneers
Chapter 03. Veneers Combined with Crowns and Bridgework
Chapter 04. Limits of No-Prep Veneer
Chapter 05. Other Veneer Procedures
Chapter 06. Special Case
Chapter 07. Esthetic Principles
Chapter 08. Treatment Planning
Chapter 09. Veneer Fabrication
Chapter 10. Veneer Placement

Fachgebiet(e): Ästhetische Zahnheilkunde, Patientenaufklärung, Zahntechnik
