Titel: Fundamentals of Fixed Prosthodontics

Kurztext:

The fourth edition of this popular undergraduate text has been updated and expanded to reflect new research, materials, and techniques in fixed prosthodontics, with the addition of more than 350 new illustrations and three new chapters on the restoration of implants. It is designed to serve as an introduction to restorative dentistry techniques using fixed partial dentures and cast metal, metal-ceramic, and all-ceramic restorations, providing the background knowledge needed by the novice and serving as a refresher for the practitioner or graduate student. Specific techniques and instruments are discussed, and updated information has been added to cover new cements, new impression materials and equipment, and changes in soft tissue management methods used during impression procedures. New articulators, facebows, and concepts of occlusion have been added, along with precise ways of making removable dies. Different ways of handling edentulous ridges with defects that provide better control over the functional and cosmetic outcome are also presented. Finally, the topics of esthetic and implant restorations, which have become increasingly emphasized in dental practice, are given greater attention.

Contents

Chapter 01. An Introduction to Fixed Prosthodontics
 Chapter 02. Fundamentals of Occlusion
 Chapter 03. Articulators
 Chapter 04. Interocclusal Records
 Chapter 05. Articulation of Casts
 Chapter 06. Treatment Planning for Single-Tooth Restorations
 Chapter 07. Treatment Planning for the Replacement of Missing Teeth
 Chapter 08. Fixed Partial Denture and Implant Configurations
 Chapter 09. Principles of Tooth Preparations
 Chapter 10. Preparations for Full Coverage Crowns
 Chapter 11. Preparations for Partial Coverage Crowns
 Chapter 12. Preparations for Intracoronal Restorations
 Chapter 13. Preparations for Severely Debilitated Teeth
 Chapter 14. Preparations for Periodontally Weakened Teeth
 Chapter 15. Provisional Restorations
 Chapter 16. Fluid Control and Soft Tissue Management
 Chapter 17. Impressions
 Chapter 18. Working Casts and Dies
 Chapter 19. Wax Patterns
 Chapter 20. Investing and Casting
 Chapter 21. Cementation and Bonding
 Chapter 22. Esthetic Considerations
 Chapter 23. All-Ceramic Restorations
 Chapter 24. Metal-Ceramic Restorations
 Chapter 25. Pontics and Edentulous Ridges
 Chapter 26. Solder Joints and Other Connectors
 Chapter 27. Restoration of Osseointegrated Dental Implants
 Chapter 28. Single-Tooth Implant Restoration
 Chapter 29. Multiple-Tooth Implant Restoration
