Fundamentals of Fixed Prosthodontics

Titel: Kurztext:

The fourth edition of this popular undergraduate text has been updated and expanded to reflect new research, materials, and techniques in fixed prosthodontics, with the addition of more than 350 new illustrations and three new chapters on the restoration of implants. It is designed to serve as an introduction to restorative dentistry techniques using fixed partial dentures and cast metal, metal-ceramic, and all-ceramic restorations, providing the background knowledge needed by the novice and serving as a refresher for the practitioner or graduate student. Specific techniques and instruments are discussed, and updated information has been added to cover new cements, new impression materials and equipment, and changes in soft tissue management methods used during impression procedures. New articulators, facebows, and concepts of occlusion have been added, along with precise ways of making removable dies. Different ways of handling edentulous ridges with defects that provide better control over the functional and cosmetic outcome are also presented. Finally, the topics of esthetic and implant restorations, which have become increasingly emphasized in dental practice, are given greater attention.

Contents

Chapter 01. An Introduction to Fixed Prosthodontics	
Chapter 02. Fundamentals of Occlusion	
Chapter 03. Articulators	
Chapter 04. Interocclusal Records	
Chapter 05. Articulation of Casts	
Chapter 06. Treatment Planning for Single-Tooth Restorations	
Chapter 07. Treatment Planning for the Replacement of Missing Teeth	
Chapter 08. Fixed Partial Denture and Implant Configurations	
Chapter 09. Principles of Tooth Preparations	
Chapter 10. Preparations for Full Coverage Crowns	
Chapter 11. Preparations for Partial Coverage Crowns	
Chapter 12. Preparations for Intracoronal Restorations	
Chapter 13. Preparations for Severely Debilitated Teeth	
Chapter 14. Preparations for Periodontally Weakened Teeth	
Chapter 15. Provisional Restorations	
Chapter 16. Fluid Control and Soft Tissue Management	
Chapter 17. Impressions	
Chapter 18. Working Casts and Dies	
Chapter 19. Wax Patterns	
Chapter 20. Investing and Casting	
Chapter 21. Cementation and Bonding	
Chapter 22. Esthetic Considerations	
Chapter 23. All-Ceramic Restorations	
Chapter 24. Metal-Ceramic Restorations	
Chapter 25. Pontics and Edentulous Ridges	
Chapter 26. Solder Joints and Other Connectors	
Chapter 27. Restoration of Osseointegrated Dental Implants	
Chapter 28. Single-Tooth Implant Restoration	
Chapter 29. Multiple-Tooth Implant Restoration	
Fachgebiet(e): Prothetik, Literatur fürs Studium
