## Buch-Information

**Hrsg.:** Buser, Daniel / Chen, Stephen / Wismeijer, Daniel  
**Titel:** Implant Therapy in the Esthetic Zone  
**Untertitel:** Current Treatment Modalities and Materials for Single-tooth Replacements  
**Reihe:** ITI Treatment Guide Series  
**Kurztext:**

Volume 10 of the ITI Treatment Guide series starts out with the most recent statements and recommendations of the 5th ITI Consensus Conference, followed by a detailed protocol for the evaluation and treatment planning of patients with esthetic demands requiring single-tooth replacement with a dental implant. Various surgical situations commonly encountered in the esthetic zone will be presented and recommendations on their treatment will be provided. In addition, the clinical management of the planned implant site before and after placement through the use of provisional prostheses, laboratory communication, abutment design, restorative material selection, and delivery will be examined. This volume of the ITI Treatment Guide series provides a comprehensive, evidence-based approach to single-tooth replacement in the esthetic zone, from consultation to follow-up, with a focus on current treatment modalities and on the materials that present-day implant dentistry has to offer.

#### Contents

Chapter 01. Introduction  
Chapter 02. Consensus Statements: Statements and Recommendations Obtained from the 5th ITI Consensus Conference  
Chapter 03. Preoperative Risk Assessment and Treatment Planning for Optimal Esthetic Outcomes  
Chapter 04. Selecting Biomaterials for Implant Procedures  
Chapter 05. Surgical Considerations for Optimal Esthetic Outcomes  
Chapter 06. Prosthetic Management for Optimal Esthetic Outcomes  
Chapter 07. Clinical Case Presentations  
Chapter 08. Esthetic Complications  
Chapter 09. Conclusions  
Chapter 10. References
