Buch-Information

Autoren: Victor Clavijo

Titel: Anterior Ceramic Restorations

Untertitel: Details That Make the Difference

Kurztext:

The objective of this superb book is to outline clinical protocols for ceramic restorations in the esthetic zone. From the basics of esthetic planning to the details of adhesive cementation, the author presents each topic in a logical sequence that is easy to follow and establishes this book as a go-to clinical manual. The exploration of each topic is based on scientific evidence and answers the triad of questions that matter most—when, how, and why each procedure should be performed. Detailed clinical cases demonstrate the details that make the most difference to achieving optimal results. The concepts and cases covered are intended to expand the range of any practitioner's clinical options in daily practice to achieve clinical excellence.

Contents

Chapter 01. Digital Photography in Dentistry
