## **Book information**

Authors:	Akiyoshi Funato / Tomohiro Ishikawa
Title:	4D Implant Therapy
Subtitle:	Esthetic Considerations for Soft Tissue Management

### Short text:

The authors of this book assert that for optimal esthetics and patient satisfaction, a fourth dimension-timing-must be given equal weight in implant treatment planning. The aim of this book is to introduce this new 4D concept for esthetic implant therapy and to reexamine the traditional treatment sequence of implant therapy so that practitioners and patients can achieve predictable and esthetically pleasing treatment outcomes. The importance of including patients and their individual needs and goals in treatment planning is emphasized, as is the preservation of alveolar bone, dentition, function, and esthetics over the long term through the proper execution of periodontal treatment. Topics include immediate implant placement in extraction sockets, extraction socket preservation, root submergence techniques, ridge augmentation, and soft tissue management in the esthetic region.

### Contents

Chapter 1. 4D Concept and Strategy Chapter 2. 3D Implant Placement Chapter 3. Immediate Implant Placement in the Extraction Sockets in the Esthetic Region Chapter 4. Extraction Socket Preservation and Root Submergence in the Esthetic Region Chapter 5. Ridge Augmentation Chapter 6. Peri-Implant Soft Tissue Management in the Esthetic Region Chapter 7. Treatment Planning for Single- and Multiple-Tooth Implant Cases Chapter 8. 4D Concept Technique Guide

**Categories:** 

Implantology, Periodontics
