

3-4 October 2025

Bora Korkut

ESTHETIC ANTERIOR COMPOSITE
RESTORATIONS

2-DAYS HANDS-ON COURSE

Contemporary Techniques in Clinical Practice

Rubber-Dam Isolation, Diastema
Closure, Crown Fracture and
Injectable Veneer Restorations

OBJECTIVES of the Course

1. To understand the correct indications and contra-indications for an anterior composite restoration.
2. To learn pre-restorative procedures and clinical application protocols.
3. Ability to select the correct resin-based composite and instruments for the appropriate restoration type.
4. To learn alternative composite shade selection techniques, clinically.
5. To learn anterior rubber-dam isolation materials and clinical application protocols.
6. To learn minimally invasive preparation protocols, clinically.
7. Ability to correctly use the selected adhesive system and to learn photopolymerization protocols.
8. To learn monochromatic and polychromatic layering techniques.
9. Ability to use the selected resin-based composite with the proper layering technique.
10. To learn additive and subtractive finishing techniques.
11. To perform an effective polishing protocol in a very short time, clinically.
12. To learn primary and secondary morphology and how to perform it clinically.
13. Ability to operate a diastema closure, crown fracture and full veneer restorations, clinically.

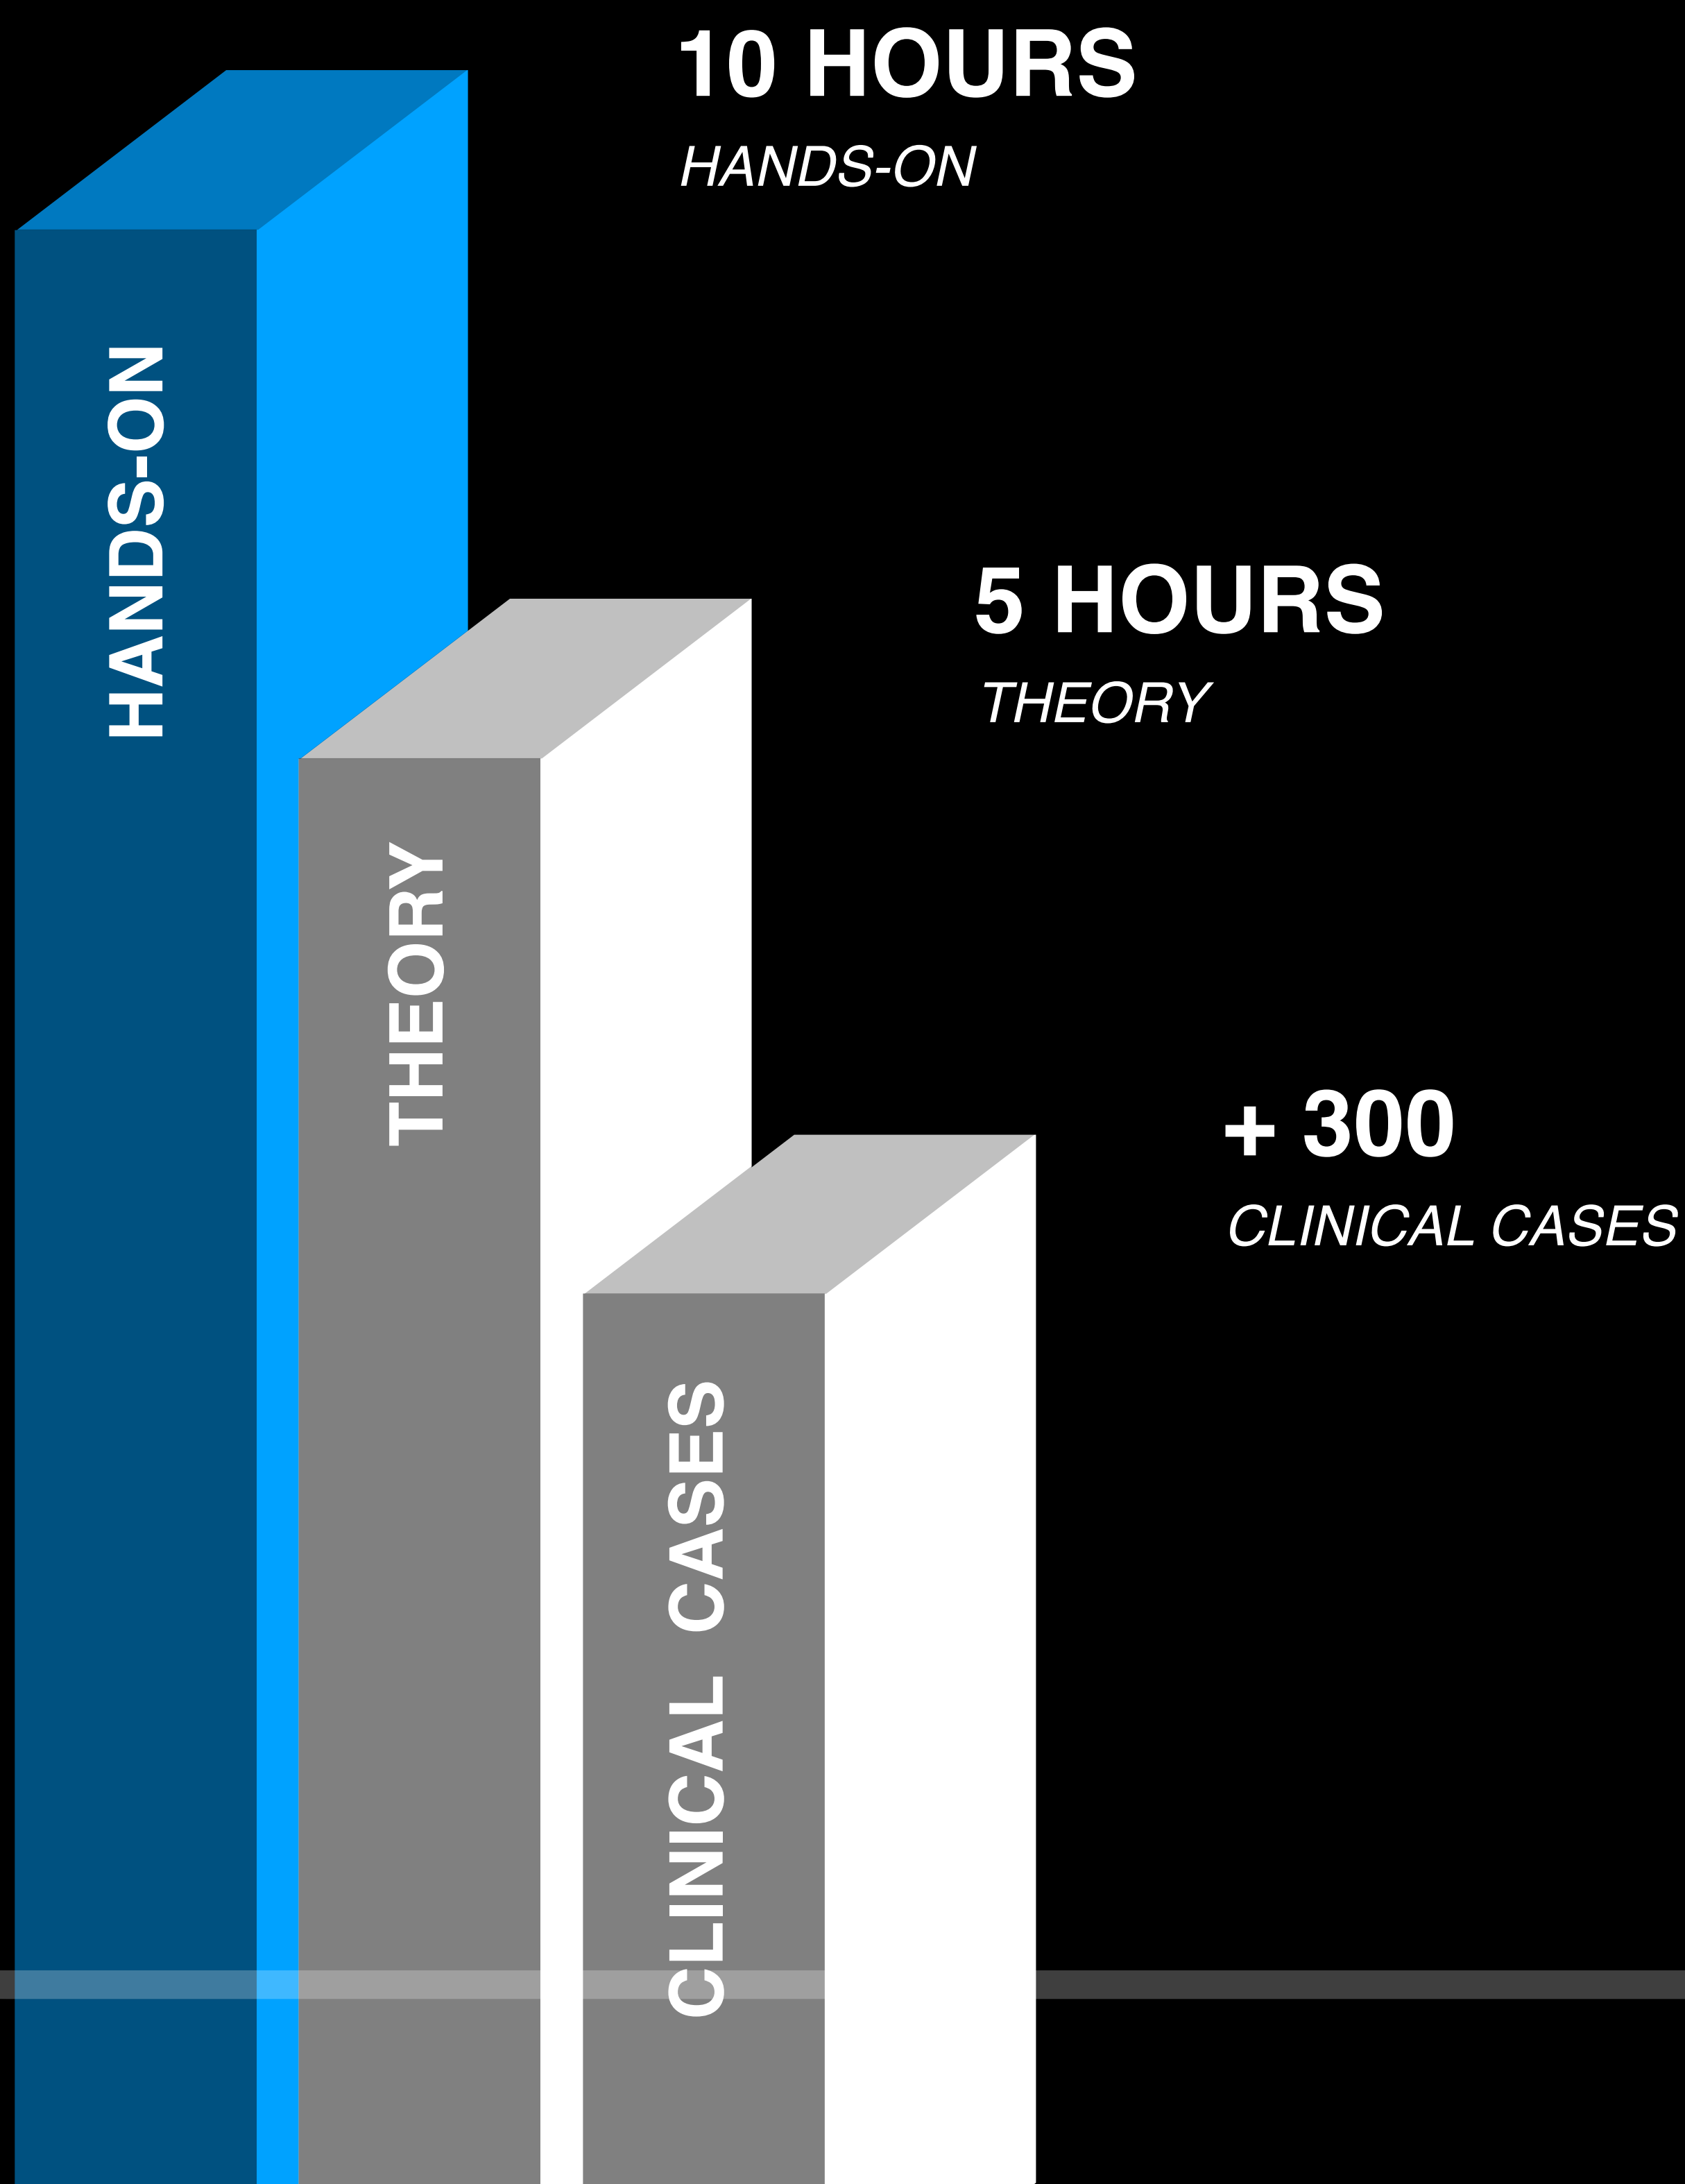

You don't have to be great to start, but you have to **start to be great**

The course is suitable for both young and experienced dentists who want to improve their skills in dental aesthetic restorations. You will master the techniques through a 2-day hands-on course.

The perfect course

During the course, participants will have the opportunity to work on anatomical models for a total of over 10 hours.

Each technique will be thoroughly explained beforehand through an in-depth theoretical discussion led by the instructor.

LEARNING OUTCOMES of the Course

- 1. Participants will be able to identify the correct indications for an anterior composite restoration.*
- 2. Participants will learn pre-restorative procedures and clinical application protocols.*
- 3. Participants will be able to clinically perform anterior rubber-dam isolation.*
- 4. Participants will learn and apply alternative clinical protocols for a non-prep monochromatic diastema closure restoration.*
- 5. Participants will learn and apply alternative clinical protocols for a polychromatic crown fracture restoration.*
- 6. Participants will learn and apply alternative clinical protocols for monochromatic and polychromatic full veneer restorations.*

COURSE PROGRAM

SIMULTANEOUS TRANSLATION PROVIDED

1st Day Program

09:00 – 11:30 LECTURE

- * Treatment planning and indications for anterior composite restorations*
- * Pre-restorative approaches (short-term clear aligner treatment, resin infiltration)*
- * Composite resin selection (monoshade, simplyshade, polyshade composites)*
- * Instrument selection (spatulas and curing units)*
- * Composite shade selection*
- * Isolation (anterior rubber-dam application)*
- * Preparation and beveling*
- * Dental adhesion*
- * Monochromatic composite layering*
- * Additive layering technique for diastema closure restorations*
- *Finishing and polishing protocols*

11:45 - 13:00

Hands-On

Anterior rubber-dam isolation

14:00 - 18:00

Hands-On

Diastema closure with monochromatic free-hand layering technique

COURSE PROGRAM

SIMULTANEOUS TRANSLATION PROVIDED

2nd Day Program

09:00 – 11:30 LECTURE

- *Polychromatic composite layering (generating the mamelon effect and masking discoloration)*
- *Additive layering techniques for crown fracture restorations*
- *Subtractive layering techniques for direct veneer restorations*
- *Injection molding technique and injectable veneer technique (iVeneer)*
- *Finishing protocols (primary morphology)*
- *Surface texturing (secondary and tertiary morphologies)*
- *Polishing protocols*

11:45 - 13:00

Hands-On

Crown fracture
restoration
(polychromatic layering
technique)

14:00 - 18:00

Hands-On

Direct veneer restoration
(composite injection /
iVeneer technique)

Bora Korkut

Associate Professor in Restorative Dentistry
He has participated as an instructor in more than 100 hands-on courses

**INTERNATIONAL
SPEAKER FROM**
Turkey

60% Practical

40% Theoretical

Esthetic Anterior Composite Restorations

With the purchase of the course, participants will also receive the Speaker's book, published by Quintessence Publishing. During the event, there will be a dedicated time for the Author to sign copies.

Registrations

Price of the course : € 1,200 + VAT (€ 1,464)

Registrations by 30/06/2025 and under 35: €1080 + VAT

To book your spot : write to info@quintessenzaedizioni.it
A deposit of € 300 will be required by bank transfer.

To purchase the course online: www.quintessenzaedizioni.com
Payment by Credit card or PayPal.

The course will be confirmed once a minimum of 12 participants has been reached.

INFO:
info@quintessenzaedizioni.it

In case of cancellation by the participant, the deposit will be refunded only if written notice is received by the organizing office no later than 90 days before the start of the event.

Why Choose Venini Academy

Venini Academy is a center of excellence for professional training located in Milan.

The facility is divided into three specialized areas:

- **Conference Room: Accommodates up to 30 participants.**
- **Training Room: Designed to host 20 trainees, each provided with an individual workstation that replicates a real dental unit.**
- **Clinical Area: Located within the nearby Medical Center Venini 23, this area features three fully equipped dental units connected via live streaming to the Academy, allowing real-time broadcast of surgical procedures on patients.**

What Makes Us Unique

30 rooms with live streaming capabilities

11 Zeiss Extra 300 microscopes available for participants

Workbenches complete with mannequins and air-water suction systems

Surgical lights with integrated video cameras at each workstation

How to Reach Venini Academy

The facility is located at Via Giulio e Corrado Venini 23, 20127 Milan, in the heart of the city, and is easily accessible by all means of transport:

By Plane or Train: Just a few minutes from Milan Central Station.

By car: An affiliated parking facility is located just steps away.

By public transport: Venini Academy is a 5-minute walk from the Loreto (M1-M2) and Caiazzo (M2) metro stations.
