

Acceptable Material

Original manuscripts are considered for publication on the condition that they have not been published or submitted for publication elsewhere, including submission to or posting by a preprint repository. Manuscripts concerned with reports of basic or clinical research, clinical applications of implant research and technology, proceedings of pertinent symposia or conferences, quality review papers, and matters of education related to the implant field are invited.

Manuscript Submission

Submit manuscripts via JOMI's online submission service:

www.manuscriptmanager.net/jomi

- Manuscripts should be uploaded as a Microsoft Word (.doc/.docx) file with the images saved as separate high-resolution art files (See "Figures and Tables").

Mandatory Submission Form

The Mandatory Submission Form must be signed by all authors, in the same order as authors are listed on the title page, and uploaded to the online submission service at the time of first submission. The form can be found at:

<http://www.quintpub.com/journals/jomi/submission.pdf>

Authorship

Authors listed on the manuscript must have made substantial contributions to the conception and design of the study, the acquisition or interpretation/analysis of the data, or the drafting/writing and revision of the paper itself. Please limit authors to six, unless reasonable explanation can be given to justify additional authors.

Manuscript Preparation

The journal generally will follow as much as possible the recommendations of the International Committee of Medical Journal Editors in regard to preparation of manuscripts and authorship (Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals; www.icmje.org/recommendations). Please note that manuscripts that have been submitted to or posted by a preprint repository will not be considered for publication in JOMI.

Manuscripts should be double-spaced with at least a one-inch margin all around. Number all pages. Do not include author names as headers or footers on each page.

Title page

The title page should include the title of the article and the name, academic degrees, and professional affiliation of each author. Mailing address and email address must also be provided for the corresponding author. If the paper was presented before an organized group, the name of the organization and the date and location of the presentation should be included.

Abstract/Keywords

The abstract should include a maximum of 350 words. A list of keywords should also be provided, not to exceed six. Abstracts for basic and clinical research articles must be structured with the following four sections: Purpose, Materials and Methods, Results, and Conclusions.

Manuscript format and length

The text components of the manuscript (eg, Introduction, Materials and Methods, Results, Discussion, and Conclusions) should not exceed 4,000 words.

Acknowledgments

Persons who have made substantive contributions to the study can be acknowledged at the end of the article. Also specify grant or other financial support, citing the name of the supporting organization and grant number.

Conflict of interest

Each article MUST have a conflict of interest statement to move into peer review. State any conflict of interest of any of the authors, or include a statement that the authors have no conflict of interest related to the study.

Figure legends

Figure legends should be typed as a group at the end of the manuscript. Detailed but concise legends are encouraged. For photomicrographs, specify the stain used in preparing the tissue section; a scale bar must also be included on each image to clarify magnification.

Abbreviations

The full term for which an abbreviation stands should precede its first use in the text unless it is a standard unit of measurement.

Trade names

Generic terms are to be used whenever possible, but trade names and manufacturer should be included parenthetically at first mention.

Numbers

Per SI convention, authors are requested to use decimal points rather than commas for fractional numbers.

References

All references must be cited in the text, numbered in order of appearance. The reference list should appear at the end of the manuscript in numeric sequence. Do not include unpublished data (including data from manuscripts posted by a preprint repository) or personal communications in the reference list. Cite such references parenthetically in the text and include a date. Avoid using abstracts as references. Provide complete information for each reference, including names of all authors (up to six). If the reference is part of a book, also include the chapter title and names of the book's editor(s).

Journal reference style:

1. Roehling S, Gahlert M, Janner S, Meng B, Woelfler H, Cochran DL. Ligature-induced peri-implant bone loss around loaded zirconia implants. *Int J Oral Maxillofac Implants* 2019;34:357–365.

Book reference style:

1. Wang HL, Decker A, Testori T. Maxillary transcrestal sinus floor elevation. In: Nevins M, Wang HL (eds). *Implant Therapy: Clinical Approaches and Evidence of Success*, ed 2. Quintessence, 2019:263–278.

Adherence to Guidelines

Manuscripts not prepared in accordance with these guidelines or written in improper English will be returned with instructions to correct these problems prior to resubmission and review.

Permissions and Waivers

- Permission from the author and publisher must be obtained for the direct use of material (text, photos, drawings) under copyright that does not belong to the author.
- Waivers must be obtained for photographs showing persons. When such waivers are not supplied, faces will be cropped to prevent identification.
- Permissions and waivers should be uploaded along with the Mandatory Submission Form.

Figures and Tables

- All figures and tables should be numbered and cited in the text in order of appearance. Tables can be included at the end of the manuscript or uploaded as separate Word documents.
- All figures must adhere to the following guidelines:
 - Clinical images should be at least 300 dpi at 3.5 inches wide.
 - Images grouped together (eg, 1a–1c) must be saved as individual files (eg, 1a, 1b, 1c).
 - Line art (eg, graphs, charts, line drawings) should be provided as editable vector art (eg, Illustrator or EPS files.)
 - Images containing type should either be saved as a layered file or provided along with a second file with type removed.
 - Videos that demonstrate a specific procedure can be linked to the manuscript.
- All forest plots will be published online only, as-is, as Appendix Figures.

If after article acceptance the publisher determines that images are of substandard quality for print, authors will be notified that the article will be published in the online edition only unless better images can be provided.

Study Protocol

All clinical trials must be registered in a renowned registry of clinical trials (eg, clinicaltrials.gov). Please state the identification number in the Materials and Methods section.

Ethics Approval

Provide the name of the human ethics committee (eg, IRB) and the registration number of approval (mandatory for all interventional studies). The committee name and registration number should appear in the manuscript following the abstract. We also encourage providing this for observational studies.

Adherence to Preferred Reporting

Manuscripts not prepared according to the preferred reporting guidelines below or written in improper English will be returned with instructions to correct these problems before resubmission and review.

Reporting Guidelines and Checklists

The preferred reporting guidelines and relevant checklists for the main study types in IJOMI are listed below. Other reporting guidelines, eg, practice guidelines, qualitative research, quality improvement studies, and economic evaluations, can be found on the Equator Network website (www.equator-network.org/). Please note that the completed applicable checklists and appropriate documentation (flow diagram, etc.) must be uploaded with your submission.

- Animal research (ARRIVE)—(<https://www.equator-network.org/reporting-guidelines/improving-bioscience-research-reporting-the-arrive-guidelines-for-reporting-animal-research/>)
- Case reports (CARE)—(<https://www.equator-network.org/reporting-guidelines/care/>)
- Diagnostic/Prognostic studies (STARD)—(<https://www.equator-network.org/reporting-guidelines/stard/>)
- Observational studies (STROBE)—(<https://www.equator-network.org/reporting-guidelines/strobe/>)
- Randomized trials (CONSORT)—(<https://www.equator-network.org/reporting-guidelines/consort/>)
- Systematic reviews (PRISMA)—(<https://www.equator-network.org/reporting-guidelines/prisma/>)

Artificial Intelligence (AI) Use Statement

Authors must disclose whether generative or nongenerative AI-assisted technologies (eg, large language models or image creators/editors) were used to produce part of the submitted work by including in the Materials and Methods or Acknowledgments section detailed information on the specific use of these technologies during the production of the work (eg, as a methodologic component of the study or as aids in the writing), as well as the name of the AI tools employed and their version. Please note that clinical images generated by AI are strictly forbidden.

Editors may decide to reject a manuscript if the use of AI-assisted technologies is considered inappropriate.

Because authors are fully responsible for the accuracy, integrity, and originality of the submitted work, AI-assisted technologies

cannot be listed as authors or coauthors, and any AI-generated language must be revised responsibly to ensure accuracy. Finally, information created by AI technologies cannot be cited as sources in the reference list.

Review/Editing of Manuscripts

Manuscripts will be reviewed by the editor-in-chief and will be subjected to blind review by the appropriate associate editor and reviewers with expertise in the field that the article encompasses. The publisher reserves the right to edit accepted manuscripts to fit the space available and to ensure conciseness, clarity, and stylistic consistency, subject to the author's final approval.

Changes to Authorship

After a manuscript has been accepted, any request for changes to authorship (addition, deletion, or author order) must be made by the corresponding author to the managing editor. The reason for the change should be described, with written confirmation of the change by all authors, including any author being added or deleted.

Publication

Every effort is made to publish accepted articles expediently. Authors should address all inquiries regarding this process to the Managing Editor, Ms Jaye Haines (jhaines@quintbook.com). If you

want or need your article published quickly, we offer an expedited service of \$500 for a 1-month turnaround from acceptance to final ahead-of-print publication. Please contact the Managing Editor if you are interested in this option.

Online-Only Articles

The journal reserves the right to publish any accepted article in the online version only. Most technical and case reports will appear only in online format, but they are included in the issue's Table of Contents, with the abstracts presented on a full page in the print issue.

Article Sharing

- Twelve months after acceptance, authors can share their accepted (postprint) manuscript via noncommercial platforms (but excluding preprint repositories), such as their institutional repository.
- Authors can share the final PDF of their article with a maximum of 50 addresses/recipients. They are granted a nonexclusive, nontransferable limited license, without right of sublicense, to post this PDF only on their own personal (noncommercial) website, provided that the website has not been created or maintained by or affiliated with any online provider of dental education information or materials.
