## Book information

**Authors:** José dos Santos  
**Title:** Occlusion  
**Subtitle:** Principles & Treatment

**Short text:**

Postulating that biologic equilibrium of the masticatory system must be a fundamental concern of all restorative dentists, the author hopes to sidestep controversy by presenting a scientific and functional guide to the masticatory system. Key conceptual and diagnostic issues—such as maxillomandibular relations and movement, use of articulators, and differential diagnosis of maxillofacial pain—serve as the foundation for the following chapters, which address clinical aspects of occlusal treatment: diagnosis and treatment protocol, fabrication of bite splints, treatment of temporomandibular disorders, the creation of functional restorations, occlusal adjustment, and treatment of malocclusion. This book should be required reading for all clinicians, so they may understand the effects of their treatment on the patient's occlusion.

**Contents**

Chapter 1. Maxillomandibular Relations and Movements  
Chapter 2. Articulators and Their Uses  
Chapter 3. Differential Diagnosis of Maxillofacial Pain  
Chapter 4. Diagnosis and Treatment Protocol  
Chapter 5. Fabrication of Occlusal Bite Splints  
Chapter 6. Conservative Treatment of Temporomandibular Disorders  
Chapter 7. Geometric Determinants for Functional Restorations  
Chapter 8. Occlusal Adjustment of the Adult Natural Dentition  
Chapter 9. Interceptive Occlusal Treatment of Malocclusion

**Categories:** Functional Therapy
