Buch-Information

Autoren: Arun K. Garg

Titel: Full-Arch Implant Rehabilitation

Kurztext:

The full-arch implant rehabilitation (FAIR) protocol is one of the newest implant therapy innovations to treat the edentulous or nearly edentulous patient. The FAIR prosthesis is immediate, fixed, esthetically pleasing, highly functional, inexpensive, and maintainable, and it can frequently be installed without bone grafting. This book describes how the FAIR protocol works, who it should be used for, and methods to implement it successfully for different patients. The system can be used in both arches and in patients with total or near-total edentulism. Several chapters are devoted to describing step-by-step treatment with detailed clinical photographs documenting every step from initial assessment to prosthesis delivery. Even those new to fixed denture systems will find the procedures easy to follow and can begin implementing the FAIR approach for their patients.

Contents

- Chapter 01. Evolution of the FAIR Protocol
- Chapter 02. History of Tilted Implants with an Immediate Prosthesis
- Chapter 03. Identifying and Evaluating Candidates
- Chapter 04. The FAIR Technique and Its Modifications
- Chapter 05. Treating the Fully Edentulous Maxilla
- Chapter 06. Treating the Fully Edentulous Mandible
- Chapter 07. Treating the Partially Edentulous Maxilla
- Chapter 08. Treating the Partially Edentulous Mandible
- Chapter 09. The Definitive Prosthesis
- Chapter 10. Possible Complications with FAIR

Fachgebiet(e): Implantologie
