Buch-Information

Autoren: Geoffrey Bateman / Shuva Saha / Iain L. C. Chapple

Titel: Contemporary Periodontal Surgery

Untertitel: An Illustrated Guide to the Art behind the Science

Reihe: QuintEssentials of Dental Practice

Kurztext:

This book aims to provide an evidence-based and highly illustrative approach to a comprehensive repertoire of surgical procedures, including: basic principles, resective surgery, regenerative techniques and periodontal/peri-implant plastic surgery. It emphasizes the importance of case selection and planning to successful outcomes and extols the benefits of microsurgical instrumentation. The distinction between periodontal and other forms of oral surgery is made, principally that in periodontal surgery, the contour and quality of the tissues post-operatively is vital to longer-term success and therefore careful soft tissue management is pivotal.
