Authors: Bernard C. Kolster
Title: Anatomische Tafeln
Short text:

Basic anatomical knowledge with large-format, unique graphics – now in a corrected and revised edition. The "Anatomical Charts" illustrate the basic knowledge of anatomy. The large-format and colorful illustrations convey anatomical knowledge in a memorable way and provide a well-founded insight into the complex relationships between anatomical structures. The following anatomical structures are shown in detail: arteries, veins, lymphatic vessels, central nervous system, cranial nerves, autonomic nervous system, skeleton, and musculature. Numerous mnemonics and classic mnemonic devices support the learning and memorization of the anatomical information. Repetition, reference, and visualization of the anatomical structures with the "Anatomical Charts" thus becomes an optimal, efficient, and sometimes entertaining undertaking.
