Book information

Editor: Romano, Rafi
Title: The Art of Treatment Planning
Subtitle: Dental and Medical Approaches to the Face and Smile

Short text:

Proper dissemination of knowledge in the dental specialties is currently one of the biggest obstacles to consistent improvement in care. This book examines the treatment-planning process from a multidisciplinary perspective in an effort to balance the very complex process of diagnosis with the need for simplicity and coherence. Innovations in techniques and materials appear on a daily basis. At the same time, patients today demand individualized treatment plans that address not only their dental and/or esthetic problems but their self-image and personal expectations as well. Like its predecessor, *The Art of the Smile*, this book promotes theoretical understanding while offering practical insight and clinical guidance. It is intended for the beginner and the advanced clinician alike, each seeking the tools necessary to achieve an optimal result.

Contents

Section I. Recent Innovations in Treatment Planning and Methodologies
Chapter 01. Dental and Paradental Disciplines Essential for Comprehensive Treatment Planning: A Literature Review
Chapter 02. Treatment Planning and Transfer of Implants and Their Superstructures to the Clinical Field Through Guided Surgery
Chapter 03. Immediate Loading of Implants Placed into Fresh Extraction Sockets

Section II. Restoring Dental Function and Esthetics
Chapter 04. Treatment Planning for Esthetic Anterior Single-Tooth Implants
Chapter 05. Multifactorial Parameters in Peri-Implant Soft Tissue Management
Chapter 06. Implants in the Esthetic Zone: Contemporary Concepts
Chapter 07. Scientific Advances in Tooth-Whitening Processes
Chapter 08. Parameters for Integrating Esthetics with Function
Chapter 09. Soft and Hard Tissue Augmentation in the Posterior Mandible
Chapter 10. Porcelain Laminate Veneers: Predictable Tooth Preparation for Complex Cases

Section III. Innovative Concepts in Orthodontic Therapy
Chapter 11. The Proportions of Facial Balance: An Esthetic Appraisal
Chapter 12. Harmony of the Oral Components
Chapter 13. Innovations in Three-Dimensional Imaging Techniques
Chapter 14. Class II Maxillomandibular Protrusion Correction: Creating Soft Tissue Profile Harmony
Chapter 15. Esthetic Proportions of the Smile

Section IV. Achieving Facial Balance and Harmony
Chapter 16. Facial Aging
Chapter 17. Lip Repositioning Surgery: A Solution to the Extremely High Lip Line
Chapter 18. Secondary Rhinoplasty
Chapter 19. Facial Treatment with Botulinum Toxin
Chapter 20. Rebalancing the Aging Face Through Lipomodeling

Section V. Patient Communication and Motivation
Chapter 21. How to Increase Case Acceptance
