Title: Challenging Nature

Subtitle: Wax-Up Techniques in Aesthetics and Functional Occlusion

Short text:

Fabrication of posterior prosthetic teeth is an art that requires technicians to reproduce the minute details of occlusal form using difficult methods of wax-up. Written for students as well as experienced clinicians, this unique atlas will change the way that technicians wax up teeth. It guides readers, step-by-step, through the author's revolutionary wax-up technique to re-create the complex morphology of premolar and molar teeth. The accompanying text provides straightforward explanations and illustrations of all techniques. Lavishly illustrated throughout, each chapter builds technical knowledge with sections on nomenclature, morphology, wax handling and application, functional wax-up sequences for maxillary and mandibular dentition, and adhesive cementation and culminates in a series of impressive clinical cases. A must-have resource for any dental technician wanting to review occlusal form and improve the functional morphology of posterior restorations.

Contents

Chapter 1. Nomenclature: Posterior Teeth

Chapter 2. Morphologic Characteristics: Posterior Teeth

Chapter 3. Wax-up: Training Exercises

Chapter 4. Wax-up: Maxillary Teeth with Antagonists

Chapter 5. Wax-up: Mandibular Teeth with Antagonists

Chapter 6. Wax-up: Maxillary and Mandibular Teeth

Chapter 7. Clinical Cases

Chapter 8. Cementation: Adhesive Cementation

Categories: Prosthodontics, Dental Technology, Student literature
