## Book information

**Editor:** Sabeti, Mohammad / Lee, Edward S. / Torabinejad, Mahmoud

**Title:** PRF Applications in Endodontics

**Short text:**

Platelet-rich fibrin (PRF) is a second-generation autologous platelet aggregation biomaterial with a wide range of applications in medicine and dentistry. PRF is already frequently used for procedures such as bone grafting and sinus augmentation, but its application can extend to surgical and nonsurgical endodontic procedures as well. This handbook, the first of its kind, is designed to help the clinician understand and use PRF in endodontics. It discusses the science, clinical applications, and techniques for specialists and general practitioners in a concise, easy-to-read format. The applications for PRF for each endodontic procedure are laid out step-by-step with accompanying photographs and case studies.

**Contents**

Chapter 1. Stem Cells in Regenerative Medicine  
Chapter 2. History, Science, Armamentarium, and How to Make PRF  
Chapter 3. Nonsurgical Application: PRF for Regeneration Endodontics  
Chapter 4. Soft Tissue Applications  
Chapter 5. Hard Tissue Applications  
Chapter 6. PRF in Endodontic Surgery  
Chapter 7. PRF for Socket Preservation

**Contributors**

Kayvon Javid • Yvonne Kapila • Gregori M. Kurtzman • Edward S. Lee • Carlos Fernando Mourão • Yogalakshmi Rajendran • Mohammad (Mike) Sabeti • C. Cameron Taylor • Mahmoud Torabinejad • Habib Torfi • Eric Wong
