Title: Implantology in General Dental Practice

Series: QuintEssentials of Dental Practice

Short text:

Increased media attention and research have heightened awareness of dental implants as an option for missing teeth. The general practitioner is now expected to offer implants when discussing restorative treatment with patients. This book aims to explain current best practice in the principles of patient assessment and treatment planning, implant selection criteria, and surgical and restorative treatment protocols for achieving optimum functional and cosmetic results according to each individual patient's clinical needs and requirements.

Contents

Chapter 1. History and Development of Dental Implants

Chapter 2. Case Selection

Chapter 3. Patient Assessment and Treatment-Planning

Chapter 4. Surgery

Chapter 5. Prosthodontic Procedures

Chapter 6. Advanced Cases

Chapter 7. Complications and Maintenance

Chapter 8. The Future
