Book information

Authors: Geoffrey Bateman / Shuva Saha / Iain L. C. Chapple

Title: Contemporary Periodontal Surgery

Subtitle: An Illustrated Guide to the Art behind the Science

Series: QuintEssentials of Dental Practice

Short text:

This book aims to provide an evidence-based and highly illustrative approach to a comprehensive repertoire of surgical procedures, including: basic principles, resective surgery, regenerative techniques and periodontal/peri-implant plastic surgery. It emphasizes the importance of case selection and planning to successful outcomes and extols the benefits of microsurgical instrumentation. The distinction between periodontal and other forms of oral surgery is made, principally that in periodontal surgery, the contour and quality of the tissues post-operatively is vital to longer-term success and therefore careful soft tissue management is pivotal.

Contents

Chapter 01. Principles and Practice of Periodontal Surgery 1: Case Selection and Planning

Chapter 02. Principles and Practice of Periodontal Surgery 2: Basic Surgical Principles

Chapter 03. Surgical Management of Gingival Overgrowth

Chapter 04. Access Flaps for Surgical Root Surface Debridement
