

Book information

Editor: Suárez, Fernando
Title: Periodontics
Subtitle: The Complete Summary

Short text:

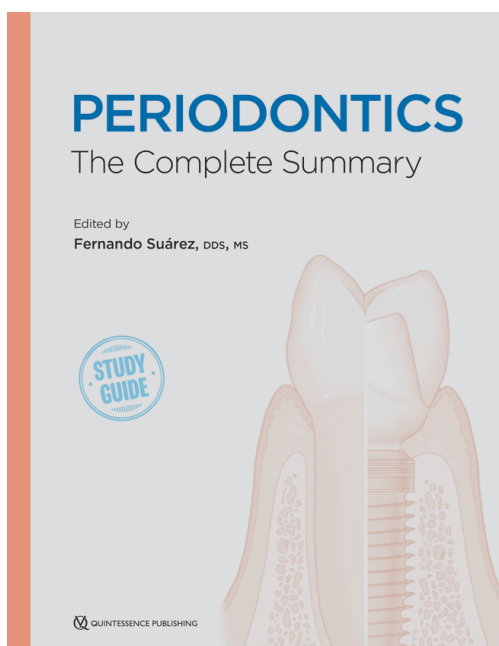

This expansive textbook covers a broad range of topics to prepare aspiring periodontists for exams as well as serving as a guide or reference for more senior practitioners. Concepts are explained in language simple enough for students but technical enough to communicate the important points and subtleties of the topic. Over 100 vocabulary words are clearly defined and explained in context to facilitate understanding of the material, and the text is accompanied by a great variety of tables, diagrams, and illustrations to allow readers to visualize the area and provide additional context for the information. The textbook begins with a basic overview of periodontal anatomy, then leads the reader through the process of diagnosis, identifying different diseases and potential risks before obtaining a prognosis and creating a treatment plan. This is followed by over a dozen chapters on various treatment methods from SRP to complex surgery and then maintenance. The book concludes with additional concepts important for young dentists to know, including an overview of relevant medications as well as abnormalities and emergencies that may be encountered in daily practice. Nothing is left out in this handy study guide, and both current students and recent graduates will find it invaluable in beginning their careers.

Contents

Chapter 01. Anatomy
 Chapter 02. Examination and Diagnosis
 Chapter 03. Gingivitis and Periodontitis
 Chapter 04. Risk Factors, Risk Determinants, Risk Indicators, and Risk Markers
 Chapter 05. Local Anatomical and Contributing Factors
 Chapter 06. Occlusal Trauma
 Chapter 07. Prognosis
 Chapter 08. Treatment Planning
 Chapter 09. Nonsurgical Therapy
 Chapter 10. Surgical Nonregenerative Therapy
 Chapter 11. Surgical Regenerative Therapy
 Chapter 12. Tissue Engineering
 Chapter 13. Periodontal Chemotherapeutics
 Chapter 14. Periodontal Wound Healing
 Chapter 15. Alveolar Ridge Preservation
 Chapter 16. Dental Implants
 Chapter 17. Marginal Bone Loss
 Chapter 18. Peri-Implant Diseases
 Chapter 19. Horizontal Bone Augmentation
 Chapter 20. Vertical Bone Augmentation
 Chapter 21. Sinus Augmentation
 Chapter 22. Mucogingival Therapy
 Chapter 23. Periodontal and Peri-Implant Maintenance
 Chapter 24. Interdisciplinary Treatment
