Authors: Sebastian Cotofana / Karl H. Wesker / Bernard C. Kolster

Title: Facial Anatomy

Subtitle: Layer by Layer

Short text:

Health care providers performing surgical and minimally invasive facial esthetic procedures require a clear, three- and four-dimensional understanding of the underlying facial anatomy. Recent research has revealed numerous new insights into this topic that lay the foundations for administering the best possible clinical care.

This Atlas compiles the latest scientific findings on facial layer-by-layer anatomy and translates complex concepts into a unique visual experience based on the "Cotofana Dissection Method." The result is a visual guide for esthetic facial treatments that provides both a reliable source of knowledge and an evidence-based foundation for clinical practice.

CHAPTERS

Forehead, Temples, Glabella, Supraorbital, Infraorbital, Nose, Medial Midface, Lateral Midface, Lips

OUTSTANDING ILLUSTRATIONS

Based on clinical dissections, the illustrations visualize the functional layers of the face according to the latest scientific findings.

PRACTICAL GUIDANCE

The text provides orientation and safety tips for esthetic and surgical facial procedures by highlighting clinically relevant anatomic details.

Categories: Facial Esthetics, Anatomy, Oral/Maxillofacial Surgery, ENT medicine
