Informazioni sul libro

Autori: Pasquale Loiacono / Luca Pascoletti
Titolo: Photography in Dentistry
Sottotitolo: Theory and Techniques in Modern Documentation
Testo breve:

Whether they are used for patient communication, consultation with a laboratory or colleague, diagnosis, clinical or legal records, or scientific presentation or publication, images are a much more powerful means of communication in the field of dentistry than the spoken or written word. However, dental photography is lacking set standards that would allow the continuity and reproducibility essential to clinical and scientific documentation. To address this need, this book presents guidelines for photographic documentation that will enable practitioners to produce images that faithfully convey clinical data. Precise instructions, including the positions of the patient, assistant, and practitioner; camera settings and flash positions; aiming and focal points; and the types and positions of required accessories are detailed in text and images, and an example of the desired final image is provided. This comprehensive text provides clinicians with all the information they need to feel confident in creating effective and compelling dental images.

Contents

Part One: Theory

- Chapter 01. General Principles of Photography
- Chapter 02. The Optical System
- Chapter 03. The Concept of Exposure
- Chapter 04. Principles of Digital Photography
- Chapter 05. The Role of Photography in Clinical Practice
- Chapter 06. Camera Settings for Dentistry
- Chapter 07. The Orthography of Images
- Chapter 08. Flash Units
- Chapter 09. Photographing Radiographs

Part Two: Techniques

- Chapter 10. Equipment and Accessories
- Chapter 11. Extraoral Series
- Chapter 12. Intraoral Series
- Chapter 13. Photographic Documentation

Argomenti: Odontoiatria multidisciplinare, Gestione dello studio, Radiologia e fotografia
