Informazioni sul prodotto

Autori: Klaus-Peter Valerius

Titolo: Lernkarten Anatomie

Testo breve:

These flashcards are intended for students of human medicine and all learners in other medical training courses. The authentic photographs of the preparations enable the viewer to visualize the individual preparation steps several times and thus gain a better understanding of the relationship of the individual structures. The natural conditions are reproduced as the learner would find them within a dissection course. The extensively labeled photographs help to clearly identify the structures depicted and thus to specifically deepen the knowledge of human anatomy and neuroanatomy.

Argomenti: Medicina generale, Anatomia, Letteratura per lo studio
