Informazioni sul libro

Autori: Matthias Aust / Svenja-Katharina Bahte / Desmond Fernandes

Titolo: Illustrated Guide to Percutaneous Collagen Induction

Sottotitolo: Basics | Indications | Uses

Collana: Aesthetic Methods for Skin Rejuvenation

Testo breve:

This book was written by the team of international authors who first described the method of percutaneous collagen induction, better known as "Needling." It provides a vivid, practically oriented, and holistic description of a highly efficient and previously little-known treatment approach for skin regeneration. Using impressive case histories, 300 outstanding didactic photographs, anatomical graphics, and convincing scientific data, the authors confirm the method's efficacy for the rejuvenating treatment of skin conditions such as scars, lines, sagging skin, and stretch marks. This attractively illustrated and clearly structured step-by-step guide takes the reader through the basics of the method's mechanism of action, perioperative organisation, and indication-related uses, highlighting the latest devices and providing expert practical tips.

Contents

Chapter 1. Basics of Dermatology

Chapter 2. Scientific Basics

Chapter 3. The Consultation

Chapter 4. Documentation Methods

Chapter 5. Perioperative Management

Chapter 6. Uses

Chapter 7. Practical Aids for the Practitioner

Argomenti: Estetica del viso
