

## Supplemental issues

This is the first supplemental issue of *EJOI* and it is fully dedicated to the 1st Consensus Conference of the German Association of Oral Implantology held in Aerzen, Germany, September 29th and 30th, 2010. Scientific associations and other organizations using *EJOI* as their official publication are welcome to publish the outcome of their consensus conferences in the journal. It is the policy of *EJOI* that these publications will not be peer reviewed as they are normally. Consequently, readers are encouraged to critically evaluate the findings presented, as they would with all scientific publications.

Guidance on how to develop critical skills for research, analysis and the evaluation of scientific publications (an important mission of *EJOI*) can be found in the 'educational articles' and on the EQUATOR (Enhancing the QUALity and Transparency Of health Research) website (<http://www.equator-network.org/>). The EQUATOR Network is

aimed at helping authors properly report their health research studies. After selecting the 'Resource Centre', please click on the 'Library for health research reporting' and you will access a comprehensive list of reporting guidelines, organised by study type. More specifically, to evaluate systematic reviews please go to the PRISMA transparency guidelines (<http://www.prisma-statement.org/>).

Since the Consensus Conference took place under the patronage of the German Association of Oral Implantology, *EJOI* does not take any responsibility for the content. The conclusions do not necessarily reflect the opinion of the board of *EJOI*.

We would like to thank all contributors to the present supplement for their efforts.

Marco Esposito, Michele Nieri,  
Jerome A. Lindeboom, Søren Schou
