Book information

Authors: Rodrigo Albuquerque / Nelson Silva / Luís Morgan

Title: Prefabricated Posts

Subtitle: From Conventional to Digital

Short text:

Restoring endodontically treated teeth is undoubtedly a complex procedure. A sound knowledge of biomechanical and clinical principles, careful planning, and the selection of appropriate materials and restorative techniques is essential to achieve the best functional and esthetic outcomes. This concise and exquisitely illustrated book, based on the philosophy and clinical experience of its authors and on sound scientific evidence, is divided into 10 chapters in a didactic sequence to make it easier for dentists to apply the techniques in every day practice. The focus is on preserving the healthy tooth structure as much as possible using both conventional and digital methodologies.

Contents

Chapter 01. Introduction
Chapter 02. Removal of Intraradicular Posts
Chapter 03. Biomechanics and Performance of Intraradicular Posts
Chapter 04. Intra-Dentinal Pins
Chapter 05. Prefabricated Fiber Intraradicular Posts
Chapter 06. Ceramic Posts
