Book information

Domenico Massironi / Romeo Pascetta / Giuseppe Romeo Precision in Dental Esthetics Clinical and Laboratory Procedures

Subtitle: Short text:

Authors:

Title:

Achieving a favorable esthetic and functional prosthetic outcome requires progression through an intricate sequence of clinical steps. The first section of this beautifully illustrated, highly practical book guides the dental practitioner through each of these steps in the treatment of various common clinical situations. The second part addresses the technical and esthetic aspects of dental laboratory techniques, covering precision in metals and new and conventional ceramics as well as the esthetic realization of prosthetic devices, including diagnostic waxups, communication with patients and clinicians, color matching, and the fabrication of ceramic restorations. Throughout the book, the authors advocate a philosophy emphasizing close cliniciantechnician collaboration and cooperation, and they are strong proponents of the use of the microscope in most dental procedures.

Contents

Chapter 01. Managing the Treatment Plan with the Prosthetic Team Chapter 02. Magnification Systems Used in Dentistry Chapter 03. Tooth Preparation for Complete Crowns Chapter 04. Finish Line Designs for Complete Crown Preparations Chapter 05. Repositioning and Completing the Finish Line with Oscillating Instruments Chapter 06. Technical Considerations for Soft Tissue Retraction Chapter 07. Clinical Considerations for Provisional Prostheses Chapter 08. Technical Considerations for Provisional Prostheses Chapter 09. Custom Impression Trays and Impression Materials Chapter 10. Laboratory Procedures Chapter 11. Using Ceramic in Prosthetic Restoration Chapter 12. Esthetic Considerations for Ceramic Restorations Chapter 13. Cementation (with Federico Ferrari) Esthetic Dentistry, Prosthodontics, Restorative Dentistry, Dental **Categories:** Technology
