Book information

Authors: Peter A. Reichart / Hans P. Philipsen
Title: Odontogenic Tumors and Allied Lesions
Short text:

This book greatly expands the body of knowledge in the field of odontogenic tumor pathology. It describes the epidemiologic, radiologic, and histopathologic features of presently known neoplasms and hamartomatous or tumor-like lesions arising from the tooth-forming structures, as well as a number of distinctive jaw lesions that must be distinguished from odontogenic tumors. It also presents recurrence rates and, where appropriate, information about the most recent concepts for treatment. An understanding of the biologic behavior of odontogenic tumors is essential to the timely and accurate diagnosis and treatment of these complex tumors. This book will serve as a practical resource for oral and maxillofacial surgeons, maxillofacial radiologists, and, in particular, head and neck pathologists. In addition, it is an invaluable reference for researchers in this field.

Contents

Chapter 01. Introduction
Chapter 02. Classification
Chapter 03. Early Normal Odontogenesis
Chapter 04. Radiography for Diagnosis
Chapter 05. Solid/Multicystic Ameloblastoma
Chapter 06. Peripheral Ameloblastoma
Chapter 07. Desmoplastic Ameloblastoma
Chapter 08. Unicystic Ameloblastoma
Chapter 09. Squamous Odontogenic Tumor
Chapter 10. Calcifying Epithelial Odontogenic Tumor
Chapter 11. Adenomatoid Odontogenic Tumor
Chapter 12. Ameloblastic Fibroma
Chapter 13. Ameloblastic Fibrodentinoma
Chapter 14. Ameloblastic Fibro-odontoma
Chapter 15. Complex Odontoma
Chapter 16. Compound Odontoma
Chapter 17. Calcifying Ghost Cell Odontogenic Cysts/Tumors (Odontogenic Ghost Cell Lesions)
Chapter 18. Odontoameloblastoma
Chapter 19. Odontogenic Fibroma
Chapter 20. Odontogenic Myxoma or Myxofibroma
Chapter 21. Benign Cementoblastoma
Chapter 22. Metastasizing, Malignant Ameloblastoma
Chapter 23. Ameloblastic Carcinoma (Primary, Secondary [Dedifferentiated] Intraosseous; Secondary [Dedifferentiated] Extraosseous)
Chapter 24. Primary Intraosseous Squamous Cell Carcinoma (Solid)
Chapter 25. Primary Intraosseous Squamous Cell Carcinoma Derived from Odontogenic Cysts
Chapter 26. Primary Intraosseous Squamous Cell Carcinoma Derived from Keratinizing Cystic Odontogenic Tumor
Chapter 27. Clear Cell Odontogenic Carcinoma
Chapter 28. Ghost Cell Odontogenic Carcinoma
Chapter 29. Ameloblastic Fibrosarcoma
Chapter 30. Ameloblastic Fibrodentinosa and Fibro-odontosarcoma
Chapter 31. Odontogenic Carcinosarcoma
Chapter 32. Ossifying Fibroma
Chapter 33. Fibrous Dysplasia
Chapter 34. Focal Cemento-osseous Dysplasia
Chapter 35. Florid Cemento-osseous Dysplasia
Chapter 36. Cherubism
Chapter 37. Central Giant Cell Lesion (Granuloma)
Chapter 38. Aneurysmal Bone Cavity (Cyst)
Chapter 39. Simple Bone Cavity (Cyst)

Chapter 40. Lingual Mandibular Bone Depression (Stafne's Cavity)

Chapter 41. Focal Marrow-containing Jaw Cavity (Focal Osteoporotic Bone Marrow Defect)

Chapter 42. Melanotic Neuroectodermal Tumor of Infancy
