Buch-Information

Autoren:	Mario Imburgia
Titel:	(Re)smiling
Untertitel:	Restyling smiles with vertical veneers
Kurztext:	

In Mario Imburgia's *"(Re)smiling"*, the author uses a standardized method combining digital technology and the milling of vertical monolithic lithium disilicate veneers. The book provides precise instructions on how to proceed, from preparation to bonding, as well as information on the steps involved in manufacturing vertical veneers using a full digital workflow. It also details how vertical veneers can be used to restore complex cases of substance loss or discoloration, and how this method can be more effective than traditional techniques. *"(RE)smiling"* is a practical guide for practitioners who seek effective protocols that are simple to implement in their daily practice with predictable results.

Contents

Basic Principles

- Chapter 01. Vertical veneers: streamlining
- Chapter 02. The VertiCAD approach for veneer preparation
- Chapter 03. Esthetics
- Chapter 04. An app for esthetic analysis and planning
- Chapter 05. Manufacturing ultrathin veneers
- Chapter 06. Luting

Conformative Approach

- Chapter 07. Correction of malpositioning
- Chapter 08. Color correction
- Chapter 09. Diastema correction
- Chapter 10. Peg shaped teeth
- Chapter 11. Implants and veneers
- Chapter 12. Veneers and the gingival outline
- Chapter 13. The smile makeover in periodontally compromised patients
- Chapter 14. Correction of asymmetries
- Chapter 15. Veneers and orthodontics
- Chapter 16. Re-treatment

Reorganized Approach

- Chapter 17. Time management and rules for full-mouth restorations
- Chapter 18. The vertical dimension of occlusion: the one-step technique
- Chapter 19. The double-veneer technique
- Chapter 20. Deep bite correction
- Chapter 21. Optimizing esthetics and function
- Chapter 22. Restoring worn dentition

Fachgebiet(e): Ästhetische Zahnheilkunde
