Book information

Authors: Giuseppe Romeo
Title: Personalizing Smile Restoration
Subtitle: Technical, Diagnostic, and Esthetic Approach
Short text:

Achieving excellence in dental restorations requires a seamless integration of technical precision, diagnostic accuracy, and esthetic sensibility. In this insightful book, world-renowned dental technician Giuseppe Romeo shares his expertise, guiding professionals through the intricate balance of form, function, and beauty in modern prosthetics. With a focus on material selection, workflow optimization, and advanced case planning, Giuseppe Romeo presents a structured approach to crafting restorations that are both esthetically and functionally superior. Through detailed case studies, high-quality visuals, and step-by-step techniques, this book provides an indispensable resource for those striving to refine their skills and push the boundaries of dental excellence. A must-have for dental technicians, prosthodontists, and all professionals dedicated to achieving perfection in restorative dentistry.

Contents

Chapter 1. Dental Anatomical Combinations (DAC): a Guide to Ultimate Dental Esthetics
