Book information

Authors: Julio Cesar Joly / Paulo Fernando Mesquita de Carvalho / Robert Carvalho da Silva

Title: Esthetic Perio-Implantology

Short text:

This book is the culmination of extensive research and experience in the field of esthetic mucogingival surgery and implant dentistry. The authors rely on clinical documentation and scientific evidence to establish innovative esthetic protocols for the management of mucogingival complications in implant dentistry. Each advanced surgical and restorative procedure is prefaced with the scientific research, historical background, and clinical experiences that led to its development by the authors. Facets of diagnosis and the many treatment options for each case are covered clearly with a strict evidence-based philosophy. The authors have streamlined their revolutionary techniques and innovations for standardized application, and each clinical case is presented step by step and in stunning photographic detail. This book will lay the foundation for the development of clinical skills that will lead to more esthetic outcomes in some of dentistry's most challenging cases.

Contents:

Chapter 01. Perio-implantology: A decade of consolidation of the philosophical proposals

Chapter 02. Soft tissue grafts, alveolar flaps, and tissue substitutes

Chapter 03. Single and multiple recession defects: Treatment planning and surgical procedures

Chapter 04. Therapeutic alternatives to treat a gummy smile

Chapter 05. Tridimensional ridge augmentation: Horizontal and vertical

Chapter 06. Simultaneous tissue reconstruction and implant placement at healed sites

Chapter 07. Socket management: Immediate implant placement and socket preservation

Chapter 08. Treatment options for implants with esthetic sequelae

Chapter 09. Therapeutic strategies for the treatment of multiple adjacent missing teeth in the anterior area

Chapter 10. Peri-implant prosthetic management for restorative excellence: Clinical and laboratory stages.
