Buch-Information

Hrsg.: Hülsmann, Michael / Schäfer, Edgar

Titel: Problems in Endodontics

Untertitel: Etiology, Diagnosis and Treatment

Kurztext:

With advances in endodontic techniques, increasingly complicated cases are undertaken—with variable results. As a consequence, the majority of procedures carried out by endodontic specialists today are retreatments. This book offers clinically relevant information for overcoming common problems in endodontic treatment. Due to the unpredictable nature of challenging endodontic cases, this is not a step-by-step manual, but rather a compendium of the latest knowledge in the field, including key findings and data from the scientific literature as well as case presentations and practical advice. A valuable reference for endodontists faced with treating compromised endodontic cases.

Contents

Chapter 01. Diagnosis
Chapter 02. Preserving Pulp Vitality
Chapter 03. Problems in Treatment Planning
Chapter 04. Health-Related Problems
Chapter 05. Preoperative Restoration and Placement of Rubber Dam
Chapter 06. Problems in Dental Anesthesia
Chapter 07. Problems in the Treatment of Endodontic Emergencies
Chapter 08. Problems in Gaining Access to the Root Canal System
Chapter 09. Visualization
Chapter 10. Problems in Determining Endodontic Working Length
Chapter 11. Problems in Root Canal Preparation
Chapter 12. Problems in Disinfection of the Root Canal System
Chapter 13. Problems of Root Canal Obturation
Chapter 14. Problems in the Assessment of Healing, Success and Failure
Chapter 15. Vertical Tooth and Root Fractures
Chapter 16. Periodontal-Endodontal Lesions
Chapter 17. Perforations
Chapter 18. Instrument Fractures
Chapter 19. Resorption
Chapter 20. Retreatment
Chapter 21. Incomplete Root Formation
Chapter 22. Aspiration and Swallowing Accidents
Chapter 23. Endodontic Treatment of Teeth with Anatomical Malformations
Chapter 24. Problems in Bleaching of Endodontically Treated Teeth
