Buch-Information

Hrsg.:	Buser, Daniel / Chen, Stephen / Wismeijer, Daniel
Titel:	Implant Therapy in the Esthetic Zone
Untertitel:	Current Treatment Modalities and Materials for Single-tooth Replacements
Reihe:	ITI Treatment Guide Series

Kurztext:

Volume 10 of the ITI Treatment Guide series starts out with the most recent statements and recommendations of the 5th ITI Consensus Conference, followed by a detailed protocol for the evaluation and treatment planning of patients with esthetic demands requiring single-tooth replacement with a dental implant. Various surgical situations commonly encountered in the esthetic zone will be presented and recommendations on their treatment will be provided. In addition, the clinical management of the planned implant site before and after placement through the use of provisional prostheses, laboratory communication, abutment design, restorative material selection, and delivery will be examined. This volume of the ITI Treatment Guide series provides a comprehensive, evidence-based approach to single-tooth replacement in the esthetic zone, from consultation to follow-up, with a focus on current treatment modalities and on the materials that present-day implant dentistry has to offer.

Contents

- Chapter 01. Introduction
- Chapter 02. Consensus Statements: Statements and Recommendations Obtained from the 5th ITI Consensus Conference
- Chapter 03. Preoperative Risk Assessment and Treatment Planning for Optimal Esthetic Outcomes
- Chapter 04. Selecting Biomaterials for Implant Procedures
- Chapter 05. Surgical Considerations for Optimal Esthetic Outcomes
- Chapter 06. Prosthetic Management for Optimal Esthetic Outcomes
- Chapter 07. Clinical Case Presentations
- Chapter 08. Esthetic Complications
- Chapter 09. Conclusions
- Chapter 10. References
