Buch-Information

Hrsg.: Torabinejad, Mahmoud / Rubinstein, Richard
Titel: The Art and Science of Contemporary Surgical Endodontics
Kurztext:

This book begins with a concise review of the basic science of tissues and then moves into diagnosis, treatment planning, and surgical procedures in endodontics, with an emphasis on the use of enhanced magnification, ultrasonic tips, microinstruments, newer root-end filling materials, and CBCT. Chapters on the maxillary sinus and its relation to surgical endodontics, soft and hard tissue healing, and adjunctive surgical procedures and considerations such as management of procedural accidents, resorption, root amputation, hemisection, replantation, transplantation, crown lengthening, grafting materials, and pharmacology are followed by an assessment of the outcomes of surgical endodontics based on current evidence. The accompanying DVDs present valuable videos demonstrating many of the procedures. These features provide the reader with a textbook that is concise, current, and easy to follow in an interactive manner. Written by a team of leading authorities and richly illustrated, this new compendium of state-of-the-art knowledge and protocols is essential reading for practicing endodontists and residents alike.

Contents

Chapter 01. Anatomical Zones in Endodontic Surgery
 Chapter 02. Histology of Tissues Involved in Surgical Endodontics
 Chapter 03. Bone Physiology and Metabolism in Endodontic Surgery
 Chapter 04. Radiolucent Periapical Pathosis
 Chapter 05. Diagnosis and Treatment Planning
 Chapter 06. Cone Beam Computed Tomography in Treatment Planning of Periapical Surgery
 Chapter 07. Magnification and Illumination in Apical Surgery
 Chapter 08. Local Anesthesia and Hemostasis
 Chapter 09. Soft Tissue Management
 Chapter 10. Apical Microsurgery: Application of Armamentaria, Materials, and Methods
 Chapter 11. Root-End Filling Materials
 Chapter 12. Surgical Endodontics and the Maxillary Sinus
 Chapter 13. Suturing and Postoperative Instructions
 Chapter 14. Wound Healing
 Chapter 15. Adjunctive Procedures
 Chapter 16. Pharmacology in Surgical Endodontics
 Chapter 17. Outcomes of Endodontic Surgery
