## Buch-Information

**Autoren:** Bernard C. Kolster / Uwe Paasch  
**Titel:** Illustrated Guide to Collagen Induction with Platelet-Rich Plasma (PRP)  
**Untertitel:** Rejuvenation Face | Neck | Décolleté | Hands

#### Kurztext:

Platelet-rich plasma (PRP), already frequently used in orthopedic medicine, has become more and more popular for esthetic dermatology treatments. It is now an evidence-based practice used all over the world. This illustrated guide introduces all the relevant aspects of PRP application in esthetic dermatology. In addition to basic principles, possibilities and limitations, it also provides a practical presentation of current systems for harvesting PRP. One chapter is devoted to a series of striking photographic case histories extending over the course of several months, which demonstrate both the potential and the limitations of this method. Other tools include in-depth diagrams of various regions of the face, neck, and hands and how PRP should be applied in each area as well as patient information sheets and forms. Therefore, this book serves to equip potential practitioners with all the information they need to be able to perform PRP treatments in esthetic medicine.

#### Contents

Chapter 01. Skin repair and skin regeneration as a therapeutic principle  
 Chapter 02. PRP in aesthetic medicine  
 Chapter 03. PRP preparation systems  
 Chapter 04. Application methods  
 Chapter 05. Patient management  
 Chapter 06. Documentation and organization  
 Chapter 07. Treatment  
 Chapter 08. Regional applications  
 Chapter 09. Case histories  
 Chapter 10. Aids for the practitioner  
 Appendix: References, Manufacturer directory, Index

**Fachgebiet(e):** Dermatologie
