Book information

Authors: Marc Quirynen / Nelson R. Pinto

Title: Leukocyte- and Platelet-Rich Fibrin in Oral Regenerative Procedures

Subtitle: Evidence-Based Clinical Guidelines

Short text:

This book will guide clinicians to achieve great results with L-PRF. It starts with basic science chapters on tissue regeneration, blood centrifugation, and an explanation of the biologic power of platelet concentrates. However, the true value of this book lies in an evidence-based evaluation of the benefits of L-PRF in periodontal and maxillofacial surgery, as well as in chronic wound therapy. For each treatment, a step-by-step approach has been created by experienced clinicians. The most crucial steps are explained in 18 videos via augmented reality.

Contents

General Introduction to L-PRF: Leukocyte- and Platelet-Rich Fibrin

Part A. Basic Science and Preparation of L-PRF

Chapter 01. Blood Composition and Cellular Characteristics

Chapter 02. Wound Healing

Chapter 03. Centrifugation of Blood via Specific L-PRF Protocols

Chapter 04. General Characteristics and Mode of Action of L-PRF Membranes

Chapter 05. Potential Role of L-PRF in Periodontal Regeneration

Chapter 06. Preparation of Various L-PRF Constructs

Part B. Clinical Applications of L-PRF

Chapter 07. L-PRF as Substitute for Ridge Preservation

Chapter 08. The Use of L-PRF in Sinus Therapy

Chapter 09. The Use of L-PRF During Bone Regeneration Procedures

Chapter 10. Implant Coating with L-PRF to Facilitate Osseointegration

Chapter 11. L-PRF to Promote the Regeneration of Intrabony Defects Around Teeth

Chapter 12. The Use of L-PRF for Periodontal Plastic Surgery

Chapter 13. L-PRF in the Management of Peri-Implantitis

Chapter 14. L-PRF for the Management of MRONJ

Chapter 15. L-PRF Soft-Blocks for Ridge Preservation in Sockets with Major Bone Defects

Chapter 16. Step-by-Step Protocols

Chapter 17. L-PRF for Extraoral Wounds

Epilogue
