Book information

Authors: Stefan Wolfart
Title: Implantatprothetik
Subtitle: Implant Prosthodontics: A patient-oriented concept: Planning | Treatment procedures | Evaluation | Esthetics | Function | Digital technologies | Dental technology

Short text:

This comprehensive, systematic handbook for implant prosthetic restorations has been completely revised in its second edition and is supplemented with digital workflows, all-ceramic materials, concepts for the esthetic zone, and clear handling recommendations for patients undergoing anti-resorptive therapy. Immediate restoration of the edentulous jaw, effective treatment strategies for peri-implantitis therapy, and long-term data regarding success rates are also discussed. With more than 3,000 illustrations and a large number of decision trees, the book presents a conclusive, evidence-based concept for prosthetically guided implantation and individual treatment – systematically structured from initial planning to postoperative rehabilitation – with a focus on the optimal prosthetic treatment for the individual patient. The decisive interfaces between implantology and prosthetics, and prosthetics and dental technology, as well as between the patient and dental team are explained in detail. Anyone who wants to work in a patient-oriented way in implantology and implant prosthetics should read this book!

Contents

Part A. Basics

Chapter 01. Introduction
Chapter 02. Patient profile
Chapter 03. Esthetic profile
Chapter 04. Denture profile
Chapter 05. Implant abutment profile
Chapter 06. Biomaterial profile
Chapter 07. Timing of implant placement and loading protocols in implant dentistry
Chapter 08. Emergence profile

Part B. Treatment concept and planning

Chapter 09. Treatment concept
Chapter 10. Individualized best form of treatment using decision trees

Part C. Clinical procedures

Chapter 11. Radiographic analysis and drilling templates
Chapter 12. Surgical procedures
Chapter 13. Temporary restorations
Chapter 14. Impression techniques
Chapter 15. Jaw relation determination
Chapter 16. General principles of crown and bridge restorations
Chapter 17. Challenge: Restorations in the highly esthetic zone
Chapter 18. Challenge: Fixed immediate loading of the edentulous jaw
Chapter 19. Removable restorations
Chapter 20. Occlusal concepts
Chapter 21. Digital applications in implant prosthetics
Chapter 22. Aftercare
Chapter 23. Prosthetic complications
Chapter 24. Implants and superstructures in bad times: mucositis and peri-implantitis

Part D. Restoration concepts

Chapter 25. Single tooth gap within the esthetic zone
Chapter 26. Interdental gap or free-end situation
Chapter 27. Severely reduced residual dentition
Chapter 28. Edentulous jaws

Part E. Dental workflows

Chapter 29. Fixed restorations on implants
Chapter 30. Fixed restorations on jaw-spanning implants
Chapter 31. Removable restorations on implants

Appendix
