Authors: Michael P. Waliszewski

Title: Brudvik's Advanced Removable Partial Dentures

Short text:

This brand-new edition of Dr Brudvik's classic text features hundreds of new photographs and drawings to explain the intricacies of complex RPDs. The function of each element of an RPD is described in isolation and by class, and the clinical and laboratory steps of RPD design and creation are reviewed, followed by discussions of various types of prostheses and when/how to use them. This technical manual is aimed at experienced practitioners but still presents the information in a neat, organized, and easy-to-follow manner.

Contents

Chapter 01. Treatment Planning
Chapter 02. Elements of Design
Chapter 03. Classification-Based Design
Chapter 04. Mouth Preparation
Chapter 05. Recording the Intraoral Condition
Chapter 06. Laboratory Construction of the Framework
Chapter 07. Establishing the Tooth-Frame Relationship
Chapter 08. Completion of the Partial Denture
Chapter 09. Extending Longevity
Chapter 10. Interim Resin-Based Partial Dentures
Chapter 11. Precision Attachments
Chapter 12. Special Prostheses
Chapter 13. Implants with Partial Dentures
Chapter 14. Frameworks for Implant Overdentures
Chapter 15. Lessons from RPD Evolution

With contributions from Professor Hai Zhang, DMD, PhD
