Authors: Alessandro Agnini / Andrea Mastrorosa Agnini

Title: The Digital Revolution 2.0

Subtitle: Clinico-Technical Applications in Daily Practice

Short text:

Technology has irreversibly changed our profession, ushering in a historical period full of challenges and opportunities. Leveraging digital tools to diagnose, design, plan, motivate, and execute corrective therapies is crucial for success in today's highly competitive business environment.

Planning investments, creating partnerships, facing and overcoming the learning curve, involving the team, and making technology a daily routine by stepping out of one's comfort zone are just some of the challenges for success in contemporary dentistry.

Contents

Chapter 1. Introduction to modern dentistry

Chapter 2. Digital flow technologies

Chapter 3. the smile architect

Chapter 4. The evolution of metal-free materials

Chapter 5. Full-digital approach in the management of gingival emergence profiles

Chapter 6. The role of technology in implant prosthetics

Chapter 7. Digital workflow in full-arch implants rehabilitations

Co-authors: Roberto Apponi • Giulia Benedetti

The main objective of this book is to help all members of the dental team to succeed by creating differentiation, uniqueness, predictability, and efficiency through the description of the cornerstones of digital dentistry, a concept of advanced and innovative dentistry that pursues progress.
