Title: Problems in Endodontics

Subtitle: Etiology, Diagnosis and Treatment

Short text:

With advances in endodontic techniques, increasingly complicated cases are undertaken—with variable results. As a consequence, the majority of procedures carried out by endodontic specialists today are retreatments. This book offers clinically relevant information for overcoming common problems in endodontic treatment. Due to the unpredictable nature of challenging endodontic cases, this is not a step-by-step manual, but rather a compendium of the latest knowledge in the field, including key findings and data from the scientific literature as well as case presentations and practical advice. A valuable reference for endodontists faced with treating compromised endodontic cases.

Contents

Chapter 01. Diagnosis
 Chapter 02. Preserving Pulp Vitality
 Chapter 03. Problems in Treatment Planning
 Chapter 04. Health-Related Problems
 Chapter 05. Preoperative Restoration and Placement of Rubber Dam
 Chapter 06. Problems in Dental Anesthesia
 Chapter 07. Problems in the Treatment of Endodontic Emergencies
 Chapter 08. Problems in Gaining Access to the Root Canal System
 Chapter 09. Visualization
 Chapter 10. Problems in Determining Endodontic Working Length
 Chapter 11. Problems in Root Canal Preparation
 Chapter 12. Problems in Disinfection of the Root Canal System
 Chapter 13. Problems of Root Canal Obturation
 Chapter 14. Problems in the Assessment of Healing, Success and Failure
 Chapter 15. Vertical Tooth and Root Fractures
 Chapter 16. Periodontal-Endodontal Lesions
 Chapter 17. Perforations
 Chapter 18. Instrument Fractures
 Chapter 19. Resorption
 Chapter 20. Retreatment
 Chapter 21. Incomplete Root Formation
 Chapter 22. Aspiration and Swallowing Accidents
 Chapter 23. Endodontic Treatment of Teeth with Anatomical Malformations
 Chapter 24. Problems in Bleaching of Endodontically Treated Teeth
