Title: Decision Making in Oral and Maxillofacial Surgery

Short text:

Expert contributors have synthesized their standard decision-making processes into annotated diagnosis and treatment algorithms. Combining at-a-glance understanding with authoritative discussion of the salient features of 100 pathologic entities, these treatment algorithms are especially valuable for residents, recent graduates, and others treating patients who present with therapeutic problems in the oral and maxillofacial region.

Categories: Oral/Maxillofacial Surgery, Oral Surgery
