## Book information

**Authors:** Loris Prosper  
**Title:** Bioesthetics in Oral Rehabilitation

**Short text:**

This book describes a methodology for creating biomimetic restorations that harmonize with the remaining natural teeth. The authors analyze the methodology for each phase of work, including the diagnosis and treatment planning, the stages of preparation and fabrication, and the cementation of the definitive restoration. All the essential components are covered, including occlusal analysis, soft tissue management, color selection, implant considerations, and guidelines for home maintenance. The merits of a multidisciplinary approach are shown within the functional esthetic paradigm in which the prosthodontist, surgeon, orthodontist, and dental technician work as a close-knit team to ensure a predictable and reproducible result.

**Contents**

Chapter 1. Epidemiology of Dental Esthetics  
Chapter 2. Diagnosis and Treatment Planning  
Chapter 3. Basic Concepts of Occlusion to be applied to Prosthetic Restorations  
Chapter 4. Mucogingival Surgery to improve Pink Esthetics  
Chapter 5. Dental Abutment Preparation  
Chapter 6. The Provisional Restoration  
Chapter 7. Taking a final Impression  
Chapter 8. Esthetic Dentistry with Implants  
Chapter 9. Professional and Home Maintenance of Fixed Prosthetic Restorations

**Categories:** Esthetic Dentistry, Implantology, Prosthodontics
