Book information

Authors: Martin Gross
Title: The Science and Art of Occlusion and Oral Rehabilitation
Short text:

This exhaustive book provides an overview both of current scholarly concepts and of contemporary clinical practices for managing occlusion in restorative dentistry. With an emphasis on clinical historical context, the book explains the rationale behind treatment concepts and provides evidence-based protocols for simple treatments (e.g. single restorations) to the most involved cases (e.g. fixed and removable prostheses). Featuring overviews of the relevant biological systems and the fundamentals of occlusion as well as pertinent contemporary cases presented by their original practitioners, this book offers detailed, up-to-date information on all aspects of occlusion and oral rehabilitation.

Contents

Chapter 01. Occlusion: State of the Science, State of the Art
 Chapter 02. The Human Masticatory System
 Chapter 03. Fundamentals of Occlusion
 Chapter 04. Posterior Support
 Chapter 05. Vertical Dimension of Occlusion
 Chapter 06. Excursive Guidance
 Chapter 07. Occlusion in Implant Dentistry
 Chapter 08. Dental Articulators
 Chapter 09. Treatment Planning and Diagnosis
 Chapter 10. Restoring the Occlusion: Restorative Considerations
 Chapter 11. Restoring Classes II and III and Aberrant Jaw Relations
 Chapter 12. State of the Art: Esthetic Perspectives
 Chapter 13. Restoration of the Periodontally Involved Dentition
 Chapter 14. Treatment of Severe Tooth Wear and Bruxism
 Chapter 15. Implant Supported Restorations
 Chapter 16. Management of Temporomandibular Disorders
