## Book information

**Authors:** Pasquale Loiacono / Luca Pascoletti  
**Title:** Photography in Dentistry  
**Subtitle:** Theory and Techniques in Modern Documentation

**Short text:**

Whether they are used for patient communication, consultation with a laboratory or colleague, diagnosis, clinical or legal records, or scientific presentation or publication, images are a much more powerful means of communication in the field of dentistry than the spoken or written word. However, dental photography is lacking set standards that would allow the continuity and reproducibility essential to clinical and scientific documentation. To address this need, this book presents guidelines for photographic documentation that will enable practitioners to produce images that faithfully convey clinical data. Precise instructions, including the positions of the patient, assistant, and practitioner; camera settings and flash positions; aiming and focal points; and the types and positions of required accessories are detailed in text and images, and an example of the desired final image is provided. This comprehensive text provides clinicians with all the information they need to feel confident in creating effective and compelling dental images.

**Contents**

Part One: Theory

Chapter 01. General Principles of Photography  
Chapter 02. The Optical System  
Chapter 03. The Concept of Exposure  
Chapter 04. Principles of Digital Photography  
Chapter 05. The Role of Photography in Clinical Practice  
Chapter 06. Camera Settings for Dentistry  
Chapter 07. The Orthography of Images  
Chapter 08. Flash Units  
Chapter 09. Photographing Radiographs

Part Two: Techniques

Chapter 10. Equipment and Accessories  
Chapter 11. Extraoral Series  
Chapter 12. Intraoral Series  
Chapter 13. Photographic Documentation

**Categories:** Interdisciplinary, Practice Management, Radiology and  
Photography
