## Book information

**Authors:** Rowida Abdalla

**Title:** Waxing for Dental Students

#### Short text:

When dental students are first taught how to wax teeth, they need clear instructions with logical steps and plenty of illustrations. With the omission of any distracting information about dies, crowns, bridges, and occlusion, this concise book is squarely directed to first-year dental students and can be used as a primary laboratory manual. The author covers the basics of wax instrumentation and addition, but the bulk of the book details the steps for waxing incisors, canines, premolars, and molars. Each chapter includes an introductory waxing exercise for the tooth type, followed by the key points of morphology for the tooth in question. Photographs detail the waxing steps for both a maxillary and a mandibular full crown on a tooth peg and show how the wax-up should mimic the contralateral tooth in terms of dimension, embrasures, heights of contour, line angles, and point angles. The logical and straightforward protocols in this book will help dental students quickly improve their waxing skills and reach expected goals.

#### Contents

Chapter 1. Introduction to Waxing  
 Chapter 2. Waxing Incisors  
 Chapter 3. Waxing Canines  
 Chapter 4. Waxing Premolars  
 Chapter 5. Waxing Molars  
 Chapter 6. Evaluation Criteria for Full-Crown Wax-Ups

**Categories:** Dental Technology, Student literature
