

## Book information

**Authors:** Marjan Laekeman / Roland Kreutzer  
**Title:** Palpation in Vivo  
**Subtitle:** Localizing anatomical structures precisely and palpation

**Short text:**

The ideal workbook for learning, practicing, exercising and enhancing “hand skills” in palpation anatomy. This pictorial atlas is a workbook and reference for physical therapists, physicians, osteopaths, massage therapists, and alternative practitioners – professionals who use their hands to examine and treat the musculoskeletal system. The book is about daily “handcraft” – the fast focused palpation, location, and evaluation of anatomical structures. All regions of the human body (head, torso, upper and lower extremities) are considered. All structures relevant to therapy are presented as concisely as possible and in as much detail as is necessary.

**Categories:** Physiotherapy

**Edition:** 2nd Edition 2016  
**pages:** 504  
**Images:** 950  
**Cover:** Hardcover, 19,3 x 27 cm  
**ISBN:** 978-3-86867-330-2  
**Published:** August 2016
